WORK EXPERIENCE

Oct 2022 – present
Tallinn, Estonia

Frontend Engineer, GuruDesk

- Developed over 10 advanced user interfaces daily using React 16 and Metronic 8 theme, contributing to a 30% improvement in customer satisfaction.
- Successfully migrated a multi-page user experience to a single-page application using Vue 3, resulting in an 11.28% increase in customer engagement.
- Completed an e-commerce website within a 15-day timeframe using WordPress, leading to a substantial increase in customer satisfaction.
- Utilized HTML, CSS/SASS, and JavaScript to create 100+ responsive landing pages for both company and client projects, ensuring optimal user experience across devices.

Sep 2019 – Aug 2022
Hokkaido, Japan

Frontend Engineer, SD Tech

- Led the successful migration of a multi-page user experience to a single-page application using React, resulting in an 18% enhancement in customer engagement.
- Rebuilt a 4-year-old SaaS application using React and Redux, incorporating a full user experience redesign, and delivering a successful Minimum Viable Product (MVP) in 8 months.

Mar 2017 – Aug 2019
Hokkaido, Japan

React Native Developer, Creative Hope

- Led development and optimization of mobile applications, driving a 25% increase in client satisfaction through efficient product infrastructure improvements.

Jun 2015 – Jul 2016
Taipei, Taiwan

Frontend Developer, Taroko

- Spearheaded the adoption of React.js within a team of seven developers, leading the implementation of this modern framework during my internship.
- Integrated Redux for state management, optimizing application performance and reducing load time by 32%.
- Successfully navigated the learning curve of a new technology, contributing to the team's rapid adoption and successful project deployment.
